DETAILED ACTION

Specification

1. Claims 1 and 9 are objected to because of the following informalities: in both claims, line 6, "plurality" should be --a plurality--. Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. Claims 1, 3-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Falstrom (1,801,490). Falstrom teaches a punching apparatus comprising a punch 9, a die 10 and fitting jigs 6. See Figs. 1-7. It is noted that the punch 9 and the die 10 are rotatable independently with respect to the moving part 1 and the supporting part 2 and are not rotatable relative to each other as they touch the fitting jigs.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1, 2 and 9 rejected under 35 U.S.C. 103(a) as being unpatentable over Falstrom (1,801,490) in view of France (4,610,185). Falstrom teaches everything but

Art Unit: 3724

does not teach a punched hole having a non-circular cross section. France teaches a punched hole having a non-circular cross section. See Fig. 1. Therefore, it would have been obvious to provide a variety of hole shapes such as non-circular cross sectional holes as taught by France so that manufactures can provide a wide range of punched hole shapes for their customers.

Allowable Subject Matter

6. Claims 7 and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Holliday et al. (5,730,039), Nakamura (4,555,840) and Gargrave et al. (3,848,494) teach fitting jigs of general interest.
